Dear Rector Potsch Magalhaes:

I acknowledge receipt of your December 6 letter. We understand that Mr. MacLellan had a very profitable visit to UREMG and hope that the pictures which he took will be of great interest to our Trustees and will forward copies to you for use by the University.

Concerning the Foundation grant support to the School of Domestic Sciences, I wish to advise you that I have written to Dr. Mary Beth Minden, Director of the Human Nutrition and Consumer Use Research Program of the Department of Agriculture, requesting her assistance in identifying professors in this field who might be considered as candidates for assignment to this School. Unfortunately, Dr. Minden has been out of the country, and I have not yet received a reply from her.

I am sorry that you have not had any word from Purdue University on this matter. We will continue to provide whatever assistance we can in locating candidates and will keep you informed. The question of obtaining a competent staff is indeed an urgent one, and we hope that our joint efforts will be successful in the near future.

Yours sincerely,

R. W. Richardson, Jr.
